RepVGG: Making VGG-style ConvNets Great Again

11 Jan 2021 • DingXiaoH/RepVGG • PyTorch

We present a simple but powerful architecture of convolutional neural network, which has a VGG-like inference-time body composed of nothing but a stack of 3x3 convolution and ReLU, while the training-time model has a multi-branch topology.

Free Lunch for Few-shot Learning: Distribution Calibration

ICLR 2021 • ShuoYang-1998/ICLR2021-Oral_Distribution_Calibration • PyTorch

In this paper, we calibrate the distribution of these few-sample classes by transferring statistics from the classes with sufficient examples, then an adequate number of examples can be sampled from the calibrated distribution to expand the inputs to the classifier.

Robustness Gym: Unifying the NLP Evaluation Landscape

13 Jan 2021 • robustness-gym/robustness-gym

Despite impressive performance on standard benchmarks, deep neural networks are often brittle when deployed in real-world systems.

About

Abundant opportunity

Oklahoma City has everything a prospective employee could want: OKC is thriving under a strong economic climate, diverse industries and low tax rates, which give our businesses the opportunity to grow and expand. And this means, in turn, there are great job opportunities for you.

The success of our region's economy and a stable unemployment rate did not happen overnight. For years, Oklahoma City has worked for widespread quality of life improvements and self-investment. The massive scale of our public improvement projects, along with first-class business and cost environments, have helped stoke our red-hot economic engine and propel Oklahoma City forward. In addition, the Bureau of Labor Statistics reports Oklahoma City has had one of the lowest unemployment rates in the entire country for many years.
